

STA silver award competency workbooks

The STA is committed to education and training, ensuring our members continue to deliver a highly skilled, quality service to all clients. The silver competency workbooks have been developed with CITB to provide recognition of the skills of existing timber frame erectors together with raising the skill levels of any unskilled/ untrained timber frame erectors. Using these workbooks gives our members an opportunity to achieve this goal.

You can download as PDFs from the STA website, but as they are sizable documents, trainees may find it easier to work through them when printed as an A4 booklet that can then keep as a record of their training. The costs below give prices for a range of quantities for the complete set of three workbooks.

A4 Knowledge Skills Workbook (64 pages)

A4 Health & Safety Skills Workbook (60 pages)

A4 Practical Skills Workbook (60 pages)

Please place orders with Bob Davis and allow up to 8 working days for delivery.

Email: bob.davis@structuraltimber.co.uk
